About Me

Passionate Java Programmer with 2 years of experience seeking a challenging role to enhance my skills in creating scalable and resilient software solutions. Committed to delivering high-quality code and collaborating effectively with diverse teams for project success.

Skills

Java

HTML

CSS

Javascript

Springboot

Angular

SQL

Git

RESTful APIs

Qualification

Bachelor of Engineering
Mailam Engineering College
2018-2022

Employment Background

Xacto Services Private Limited

Bangalore, May 2022 - Present

Summation

- Experienced Java programmer with **2 years** of proven expertise in crafting robust web applications using Java technologies.
- Developed and maintained web applications using Java, ensuring high performance, scalability, and reliability.
- Designed and implemented user interfaces using HTML, CSS, and JavaScript, collaborating closely with UX/UI designers to enhance user experience.
- Built and consumed RESTful APIs, ensuring seamless integration between front-end and back-end systems.
- Worked extensively with Spring Boot for developing robust backend services, streamlining dependency injection, and managing configurations.
- Developed single-page applications (SPAs) using Angular, implementing responsive designs and dynamic content loading.
- Managed and optimized databases using SQL, writing complex queries, and performing routine database maintenance and tuning.
- Utilized Git for version control, collaborating with team members through branches, merges, and pull requests to ensure code quality and consistency.
- Participated in code reviews and pair programming to maintain high code quality and knowledge sharing within the team.
- Conducted unit and integration testing to ensure software functionality and reliability before deployment.
- Collaborated in Agile/Scrum teams, participating in daily stand-ups, sprint planning, and retrospectives to enhance development processes.

Project Details

THG (THE HUT GROUP)

Project Domain : E-Commerce

Duration : Feb 2023 – Present

As a Java Programmer at THG plc, I contributed to the enhancement and optimization of the company's e-commerce platform, focusing on improving the customer experience and operational efficiency. This project involved integrating new features, refining existing functionalities, and ensuring seamless performance across various modules of the platform.

Contributions

- As a Java Programmer at THG plc, I enhanced the company's e-commerce platform, focusing on customer experience and operational efficiency.
- My role involved integrating new features, refining existing functionalities, and ensuring seamless performance across various modules.
- I developed scalable and efficient Java-based web applications and services, adhering to best practices and coding standards.
- Collaborating with UX/UI designers, product managers, and fellow developers, I ensured timely delivery of features through effective communication.
- I actively participated in code reviews and continuously improved the codebase.
- My expertise included working with relational databases and ORM frameworks like Hibernate and JPA, and creating and maintaining RESTful APIs.
- Utilized modern web technologies such as HTML, CSS, JavaScript, and Angular to build user-centric front-end applications.

GRINNELL MUTUAL

Project Domain : Insurance

Duration : May 2022 – Jan 2023

Developed and maintained a comprehensive Insurance Policy Management System for Grinnell Mutual, a leading property-casualty mutual insurance company and reinsurer. The system is designed to streamline the management of insurance policies, enhance user experience, and ensure compliance with industry regulations.

Contributions

- As a Java Programmer at Grinnell Mutual, a leading property-casualty mutual insurance company and reinsurer, I developed and maintained a comprehensive Insurance Policy Management System.
- The system was designed to streamline the management of insurance policies, enhance user experience, and ensure compliance with industry regulations.
- My role involved integrating new features, refining existing functionalities, and ensuring seamless performance across various modules.
- Developed scalable and efficient Java-based web applications and services, adhering to best practices and coding standards.
- I actively participated in code reviews and continuously improved the codebase.
- My expertise included working with relational databases and frameworks like Hibernate and creating and maintaining RESTful APIs.
- I utilized modern web technologies such as HTML, CSS, JavaScript, and Angular to build user-centric front-end applications.
- Employed tools such as Spring Boot and Git to ensure robust development and version control processes.
